

THE HISTORY OF THE UNITED STATES

The United States of America was founded on the 4th of July, 1776. It is a country of many states, each with its own government, but all united under one national government. The first President was George Washington. The country has a long history of freedom and democracy. It has fought many wars, but it has always stood for the rights of all people. The United States is a land of opportunity and hope for all who come here.
